

令和 8 年度 福知山公立大学 地域経営学部 一般選抜 前期日程 英語予想問題 4

問題 1 次の英文の要約を 200 字以内の日本語で書きなさい。

In an era where remote work has become commonplace, Japan is entering a new phase of international competition for talent. To revitalize its aging and shrinking regions, the government launched a "digital nomad visa" in 2024. This initiative targets high-skilled professionals who travel the world while working online. However, the true significance of this policy lies not just in tourism revenue, but in the creation of what is known as "relational population" (kankei jinko).

Unlike "settled population," which refers to people who move permanently, relational population consists of individuals who maintain a continuous and multi-layered connection with a region. They may visit frequently for work, participate in local festivals, or collaborate on community projects. For regional management, these people represent a vital source of "external wisdom" and diversity that can break the stagnation often found in isolated rural communities.

Attracting digital nomads requires more than just high-speed internet. Local authorities must build environments that foster interaction between visitors and locals. Co-working spaces should not be mere offices; they must function as community hubs where nomads can share their skills—such as digital marketing or global business expertise—with local entrepreneurs. When visitors feel they are contributing to the community, they are more likely to return, transforming a one-time visit into a long-term relationship.

However, challenges remain. Many rural areas are still culturally conservative and may feel uneasy about a sudden influx of foreigners with different lifestyles. Success depends on the ability of local leaders to act as "intercultural coordinators." They must prepare the community to be inclusive while ensuring that the influx of visitors does not disrupt local harmony.

Ultimately, the goal of attracting digital nomads is to build a more open and resilient regional society. In a world where physical boundaries are becoming less relevant, regions that can successfully integrate global talent into their local fabric will have a competitive advantage. The future of regional Japan depends on its ability to become a place where diverse people feel they belong, regardless of how long they stay.

【語注】 commonplace：当然の、普及した revitalize：～を活性化する digital nomad：デジタル・ノマド（IT を駆使して場所を転々としながら働く人） relational population：関係人口 multi-layered：多層的な wisdom：知恵 stagnation：停滞 isolated：孤立した、過疎の entrepreneur：起業家 inclusive：包摂的な、受け入れに寛容な fabric：構造、基盤

指導講師による解答のポイント（自己採点用）

以下の要素が含まれているか確認してください。

1. **背景:** 政府は地域活性化のため、高技能なデジタル・ノマドを誘致する新ビザを導入した。
2. **核心概念:** 本施策の真の狙いは、定住でも観光でもない、地域と継続的な関わりを持つ「関係人口」の創出にある。

3. **地域経営上の役割:** ノマドが持つ「外部の知恵」を地域に還流させるため、交流拠点（ハブ）の構築が重要となる。
4. **結論:** 多様な人々を受け入れる包摂的な社会を築くことが、縮小社会における地域の競争力と強靱性に繋がる。
